

Cleaning & Maintenance

TECHNICAL DATA SHEET

Brake Cleaner

WIKO Brake Cleaner is based on a mature special formula without caustic substances. WIKO Brake Cleaner is suited for cleaning even the most heavy dirt without difficulty and guarantees an easy application due to its fast evaporation. The product is non-corrosive and can be applied on rubber and plastic components.

Trading Units

600 ml Dose

Item no.:

ABRE.D600

Application Areas

- Universal cleaner for the whole automotive sector
- Brakes (drum brakes, disc brakes, grating, brake pads, cylinders, bushes)
- Machine parts covered extensively with dirt and oil
- Clutches (clutch grating, clutch parts)
- Engine components (carburettors, fuel pumps, oil pumps, gearboxes)

Characteristics

- Product is based on special petrol
- Optimal cleaning effect – due to fast evaporation
- Non-corrosive
- Free of FCKW and HCKW as well as caustic substances
- Contains no acetone
- Product does not corrode rubber and plastic parts – nevertheless, a compatibility test is necessary in any case.

Instructions

Shake the aerosol can intensively. Perform a spray sample. Afterwards, apply the spray crosswise from a range of 20 to 30 cm onto the designated surface and let the liquid run off. In case of strong dirt, repeat process several times if necessary.
