| 4 | 370x320x190 | 5850 gr. |

Wireless Multiroom Speaker | 30 W | Wifi | N-Play Smart Audio

Let's get smart - and let's get connected

This Wireless (Wi-Fi) Speaker is part of the Nedis® N-Play range supporting a multiroom sound experience that can be controlled at the touch of a button.

The speaker can be used as a stand-alone addition to your listening pleasure - or it can be paired with other connected devices, by using our intuitive app, to create and take control of a multiroom sound system.

A rich sound

With a 30 W peak power sound output, this wireless speaker certainly delivers a rich, nuanced, solid sound.

Six hours playtime

The integrated 1800 mAh battery is pretty powerful too, offering up to six hours of playtime in between charges.

Take control with your device

What's more, the easy to use N-Play app allows you take control of this and other connected speakers from your smartphone and tablet after you have connected it to your Wi-Fi router.

Enjoy a multiroom sound system

And then the fun begins: you can pair this Wireless Speaker to others throughout the house and stream music via Spotify, iHeartRadio and other services. Connect with Wi-Fi to enjoy music wherever you are in the house.

About the Nedis® N-Play range

We want more from our speakers today: we still want great sound and we still demand stylish looks. But increasingly what we need is connectivity and control.

Welcome to the next generation of speakers.

The Nedis® N-Play range offers you smart speakers that sound and look great, but also allow you to control your music across many different rooms, pairing speakers together to create stunning soundscapes.

An easy to use app places you wirelessly, remotely and direct in control of the music in every room of your house.

And Wi-Fi, Qplay and Linkplay all offer a choice of smart ways to connect up your speakers and take multiroom control.

Wireless Multiroom Speaker | 30 W | Wifi | N-Play Smart Audio
