

## Wireless Meat Thermometer | 0 - 250 °C | Digital Display | Timer

### General information

Cooking big cuts of meat to perfection is going to be so easy with this meat thermometer, even for inexperienced home cooks.

To make life easier, it has 8 preset temperatures, plus preset levels of doneness (rare, medium, etc.). It's also a real kitchen multitasker, with dual probes for two dishes and a wireless display unit.

Insert the probes into the cuts of meat and leave the display unit outside the oven, frying pan or barbecue. This way, you can read the internal temperature without having to take off the lid or open the oven door. In the meantime, you can focus on prepping your sides until the alarm warns you your roast has reached the temperature you set at the start.

The meat thermometer integrates a timer so you can also use it as an egg timer. The stainless steel probe is hygienically easy to clean and detachable for easy storage. A long cable and several ways to place the display within sight provide all the flexibility you need. With a range of up to 250 degrees, this meat thermometer covers all sorts of dishes and roast dinners.

### Features

- 8 preset temperatures + levels of 'doneness': beef, pork, chicken, turkey, veal, lamb, hamburgers, fish
- Wireless display with blue backlight for maximum flexibility
- Detachable probes for easy storage
