

Wi-Fi Smart Video Doorbell | App Control | microSD Slot | HD 720p

General information

With this Nedis® SmartLife video doorbell you always know there's someone at your door, no matter where you are. As soon as your visitor rings the doorbell or, thanks to motion detection, even approaches your front porch, you'll receive a push notification on your smartphone. You can then start a video call, asking the courier to drop off the parcel at your neighbours or tell that salesman you're not interested – all without opening the door.

Given that you're able to respond from any location in the world as long as your smartphone has an internet connection, this also increases home security, by making it seem like you're at home.

The HD camera (720p) has a 130° viewing angle and supports night vision, enabling you to clearly see who is at your door 24 hours a day.

No worries if you don't have time to answer the door. The images are stored on a microSD card so you can watch them any time you like.

The wireless video doorbell is easy to install by using the wires of your existing doorbell. Including angle adjustment to always mount the doorbell in an optimal position. Expand this video doorbell with our Nedis® doorbell unit (WIFICDP10BK) to hear the chime even if your smartphone is switched off.

Features

- Sends push notifications to your smartphone if someone approaches (motion detection) or rings the bell
- Motion detection can also be deactivated (e.g. if your door faces the street directly)
- 2-way communication to talk to your visitors wherever you are
- HD recording (720p) and digital zoom on your smartphone

Sales information

Order code: **WIFICDP10GY**
 Product description: Wi-Fi Smart Video Doorbell | App Control | microSD Slot | HD 720p
 Packaging: Giftbox with eurolock
 Brand name: Nedis

Quantity	LxWxH (mm)	Weight
