

Wi-Fi Smart Motion Sensor | Wired | Indoor

General information

This smart Wi-Fi motion sensor (with a 10-m range across a detection area of 120°) can be used as part of a wireless security system or simply to turn appliances on when you enter a room.

Easy to set up

Setting it up couldn't be easier as it simply connects with your Wi-Fi router to allow control by your smartphone or tablet and for alerts to be sent to your device.

Pair with other products

Alternatively, it can be paired with other devices and appliances in the Nedis® SmartLife range to trigger events, such as switching on lights, when someone enters a room.

About Nedis® SmartLife

Discover a wide and ever-expanding range of products – such as bulbs, switches, sockets, sensors, and cameras – that can all be controlled through an easy-to-use and intuitive app. With voice control features supported by Amazon Alexa and Google Home, and no need for anything more than your existing Wi-Fi network, this is the connected, smart home made simple.

Whether you're looking for a single smart bulb or socket, or you want to automate your entire house, discover how accessible smart technology is today.

Features

- Powerful PIR motion sensor – offers 10 m coverage over a 120° range
- Also suitable to be applied as a stand-alone security solution
- Easy to connect with other Nedis® SmartLife products to trigger the setting up of scenes when someone enters a room
