

Greasing Oiling Lubricating

TECHNICAL DATA SHEET

Multifunctional Spray

WIKO Multifunctional Spray is a silicone-free, low viscosity oil for lubrication and maintenance of most diverse metal parts.

Trading units

400 ml can

Item no.:

AMFS.D400

Application Areas

WIKO Multifunctional spray is applied in the areas of car industry, machine building, metalworking shops, hobby and households.

- Lubrication of threads, hinges, pulleys, springs, water taps, door and window hinges, swivel chairs, door locks, zip fasteners, precision mechanics and electrical connections (switches, plugs, couplings and cables)
- Suppression of water from metal surfaces, e.g. at electrical contacts and power outlets, car ignition systems, tools, motorcycles and outboard engines
- Easy removal of grease, tar, rubber and adhesive residues. Creates a protective film against corrosion and rust. The product is suited for all metals, engines and vehicles of all kind Loosens rusted, corroded and seized metal connections like screws, nuts, bolts, etc.

Characteristics

- Reliable protection against corrosion
- Creation of a lasting protective film
- First-rate capillary properties and penetrability
- Prevention of squeaking and creaking

Instructions

The designated surfaces have to be free of dirt, rust, oil and grease. Shake the aerosol can intensively. Perform a spray sample. Afterwards, apply the spray thoroughly.

The information contained in this data sheet, especially the suggestions for processing and application of products, is based on our experience and newest expertise. Due to the facts that materials can be very diverse and that we have no influence on the working conditions, we recommend to perform sufficient tests to validate the compatibility of the products. Our company shall neither be held liable for this information nor for a verbal or written consultation. Additionally, please consider the information of our safety data sheets.
