### Characteristics

- Easy, quick and thorough removal of most diverse residues
- Efficient removal of adhesive residues
- Non-corrosive and pH-neutral

### Instructions

Shake the aerosol can intensively before the application. Perform a spray test. Spray the designated surfaces or labels and let the product react with the surface or label. Afterwards, the label can be removed. In case of heavy staining or hardened adhesive residues, repeat the procedure if necessary. If necessary, test the compatibility of materials on parts that are not visible.

The information contained in this data sheet, especially the suggestions for processing and application of products, is based on our experience and newest expertise. Due to the facts that materials can be very diverse and that we have no influence on the working conditions, we recommend to perform sufficient tests to validate the compatibility of the products. Our company shall neither be held liable for this information nor for a verbal or written consultation. Additionally, please consider the information of our safety data sheets.
