

Ceramic Fan Heater Industrial Design | Thermostat | 3 Settings | 3000 W | Yellow

General information

The sturdy metal housing and energy-efficient PDC heating element of this industrial-design fan heater makes it perfect for your workshop or garage.

Select one of two heat settings (1500/3000 W) or use as a cooling fan on hot summer days.

The carrying handle makes this heater simple to move around your space and it's equipped with overheat protection for optimal safety.

Features

- Sturdy metal housing and energy-efficient PTC heating element - for a robust, hard-working heater
- Thermostatically controlled - to keep your workspace at the optimum temperature
- Two heat settings - for more powerful heating
- Cool air settings - for use in summer
- Overheat protection - for your safety
- Portable - with carrying handle
