Humidifier | 6 L | Hygrometer | Remote Control | Black

General information

Place yourself in control of your environment and automatically maintain a healthy, consistent atmosphere in your room with this self-adjusting, humidifier with ionisator.
This humidifier offers automatic humidity control, thanks to its hygrometer which can measure the moisture in the air and adjust its operations accordingly.
A LED screen reveals exactly the levels of humidity in the room and can be used to program your optimum settings.
A 12-hour timer control allows you to set the humidifier to automatically switch off after a chosen time.
A ceramic filter is installed in the generous 6-litre water tank to purify the water that is used to create the cool mist. In addition, the humidifier's ionisator helps to minimise the germs in the atmosphere and to remove odours from the room.
You can enhance your environment further by applying a few drops of aromatic oil to the felt that lines the bottom tray and by using the night light which switches on automatically as the light fades.
The humidifier automatically stops when its water tank is empty or when the tank is removed for filling from the base.

Features

• Monitor the atmosphere - with the humidifier's LED display of its in-built hygrometer's readings
• Automatically adjust your humidifier - to maintain a consistent environment
• Generous 6-litre tank - for uninterrupted use
• Purify the water - with a ceramic filter
• Enhance the environment - with an automatic night light, ionisator and aromatic oils
• Automatically stops - when the timer is set, the tank is empty or the tank is removed
