# DIN W48×H48mm, Universal Voltage Multi-Function Timer

#### Features

/!`

- Realization of wide range of power supply :100-240VAC 50/60Hz, 24-240VDC universal, 24VAC 50/60Hz, 24VDC universal, 12VDC
- Various output operation (6 kinds modes)
- Multi time range (16 kinds of time range)
- Wide control time (0.05sec to 100hour)
- Easy setting of time, time range, output operation mode
- Easy to check output status by indicator

Please read "Safety Considerations" in operation

## Proper Usage

#### ○ Input connection (AT11DN/AT11EN)

• Power circuit of AT11DN/EN timer does not use trans. Use isolation transformer which secondary part is not grounded as (Figure 1) to cut off peripheral current flow for supplied power to external input deivces.

• As (Figure 2), if using terminal (1) as common terminal of input signal, it may cause damage to inner circuit of AT11DN/EN timer. Use terminal ② as common terminal referring to (Figure 3).

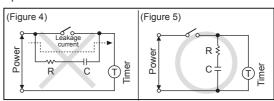

- In order to apply input signals (INHIBIT, START, RESET). short-circuit the terminal no. 2-6, 2-6 or 2-7. It may cause internal circuit damage by wrong connections.
- Do not wire INHIBIT, START, RESET signal input line with power line, high voltage line in parallel.

#### O Common

- (A) Photoelectric Sensors Please connect DC power input after checking polarity of power
- 12VDC, 24VDC, 24VAC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- When applying the power to the timer, please apply the rated power at the moment by switch, relay, etc. Otherwise it might cause malfunction.
- When supply the power to the timer, connection shown in (Figure 4) might cause malfunction due to leakage current through R and C.

Please connect R and C as shown in (Figure 5) to prevent malfunction.

- It might cause malfunction if changing the setting time, time range or operation mode during unit operating unit. Please change the setting time, time range or operation mode after cut the power off.
- Do not use this unit at below places.
- · Place where there are severe vibration or impact.
- · Place where strong alkalis or acids are used.
- Place where there are direct ray of the sun.
- Place where strong magnetic field or electric noise are generated.
- Installation environment
- · Indoors
- Altitude max. 2,000m
- · Pollution degree 2
- Installation category II
