

Upper-Arm Blood Pressure Monitor | LCD | Time & Date | 60 Memory Storage

General information

This monitor has automatic inflation and measurement to conveniently check your blood pressure at home.

It is equipped with an indicator that returns instant test results and it can save up to four groups of 30 readings to show how your blood pressure has changed over time.

The monitor has a measuring range between 0 mmHg and 300 mmHg and an accuracy of approximately 3 mmHg.

An automatic switch off after one minute of inactivity helps reduce your battery usage.

Features

- Easy to use - with automatic inflation and instant test readings
- Records your blood pressure readings over time - stores four groups of 30 readings
- Highly accurate - with a measuring range between 0 mmHg and 300 mmHg and an accuracy of approximately 3 mmHg
- Automatically switches off after a minute's inactivity
