Snapping a terminal block onto DIN-rail (to the left or to the right).

Removing a terminal block from the assembly (to the left or to the right).

#### Conductor termination

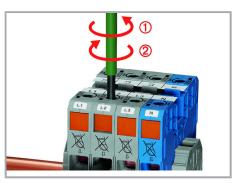

#### Conductor termination - step 1:

Rotate the operating tool (5.5 mm blade width) counter-clockwise. Next, push in the orange locking tab. The clamp is locked open for hands-free wiring.

#### Conductor termination - step 2:

Insert a stripped conductor into the clamping unit until it hits the backstop. Hold in this position.

#### Conductor termination - step 3:

A short counter-clockwise rotation closes the clamp, securing the conductor. When unlocked, allow the operating tool to rotate clockwise to securely terminate the conductor.
