

6.35 mm Connector | Angled | Male | Nickel Plated | Solder | Cable input diameter: 8.0 mm | Aluminium | Black | 1 pc |

General information

The Nedis® on-stage series packs a wide range of superior-quality connectors and cables. It provides a complete wiring solution covering both short and long distances. This leaves you to produce the ultimate studio recordings or deliver a mind-blowing on-stage performance in every thinkable situation. Connect instruments, microphones, amplifiers and a multitude of other devices for every (semi) professional music performance demanding a stunning and solid sound reproduction. The Nedis® on-stage solution also includes cables and connectors for fog and bubble machines, light shows and many more. This will top off your stage act with special effects that will leave your audience in awe.

Features

- Durable die-cast zinc connector for a firm connection
- Specifically engineered for amplifiers, music instruments and microphones
