\*2: Do not pull the Ø4mm cable with a tensile strength of 30N or over and the Ø5mm cable with a tensile strength of 50N or over. It may result in fire due to the broken wire. When extending wire, use AWG22 cable or over within 200m.  
\*3: The weight with packaging and the weight in parentheses is only unit weight. ⚠ Environment resistance is rated at no freezing or condensation.

**■ Connection of Power Supply**

Be sure to connect the power after connecting the load, because direct connection of the proximity sensor may cause damage to the inner circuit of this product.

**■ Mutual-interference & Influence by Surrounding Metals**

⚠ **Mutual-interference**  
When several proximity sensors are mounted closely, malfunction of sensor may be caused due to mutual interference. Therefore, be sure to keep a minimum distance between the two sensors, as below charts.

⚠ **Influence by surrounding metals**  
When sensors are mounted on metallic panel, it is required to protect the sensors from malfunction by any metallic object. Therefore, be sure to keep a minimum distance as below chart.

**■ Setting Distance**

- Sensing distance can be changed by the shape, size or material of the target. Therefore please check the sensing distance as (a), then pass the target within range of setting distance(Sa) as (b).
- Setting distance(Sa) = Sensing distance(Sn)×70%  
E.g.)PR30-10AO  
Setting distance(Sa) = 10mm×0.7=7mm

**■ Installation and Tightening Torque**

When tightening the nut, use the provided washer as [Figure 1] according to the distance from the fore-end. The front part of the product is from the fore-end to the dimension on the below table, and the rear part is from the tip of the nut to the end of the product. [Figure 2]  
In case the nut is placed in the front part of the product, apply tightening torque for front part.  
[Table 1] the allowable tightening torque table is for inserting the washer as [Figure 3].

[Table 1]

Model	Strength	Front		Rear
		Size	Torque	
PR12	Flush	13mm	6.37N·m	11.76N·m
	Non-Flush	7mm		
PR18	Flush	-	14.7N·m	-
	Non-Flush	-		
PR30	Flush	26mm	49N·m	78.4N·m
	Non-Flush	12mm		

**■ Caution during Use**

- Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
- Wire as short as possible and keep away from high voltage lines or power lines, to prevent surge and inductive noise. Do not use near the equipment which generates strong magnetic force or high frequency noise (transceiver, etc.). In case installing the product near the equipment which generates strong surge (motor, welding machine, etc.), use diode or varistor to remove surge.
- Do not connect capacity load to the output terminal directly.
- This unit may be used in the following environments.
  - ⓐ Indoors (in the environment condition rated in 'Specifications')
  - ⓑ Altitude max. 2,000m
